SADTU MEMBERSHIP MANAGEMENT SYSTEM

SADTU continues to seek ways to achieve better efficiency in servicing members in appreciation of the first pillar of the 2030 Vision. The Union is working towards establishing a new cellular phone-based membership management system.

The platform will make it significantly easier for members to access all Union services. It will provide them with information in relation to e-learning opportunities and will further lower costs of communication for those who will acquire a Union branded mobile phone sim card. New teachers and education workers applying for membership will be able to use the online system and trace their membership application forms to speed up registration.

Members can use the system to report incidents such as harassment, lodge grievances, report shortages of LTSM, etc. It will further enhance communication between the union members more especially in critical times when the Union is seeking mandate during negotiations. They will use it to vote. Surveys on members will be conducted using the system.

The business rationale and objectives for the Membership Management system are as follows:

- Easily report statistical information to the NEC for and administrative officials of the organisation
- Automate the membership application process
- System to have the ability to group members by: National, Province, Region, Branch, Site, School and member
- Have SMS functionality – allow to send SMS to members group by: National, Province, Region, Branch, School and member
- Centrally store all membership information
- Integrate membership fees collection to PERSAL
- Produce financial related report – membership subscription fees
- Branch Secretary and Head Office to be able to print acceptance letters
- Link on the current website to allow online membership applications
- Have a report dashboard
